Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is essential that you visit www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

PART 1

SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

Single Survey

Survey report on:

Surveyor Reference	M/9796
Customer	Mr & Mrs. J & I Doig
Selling address	Borland House Kilmarnock KA3 6BW
Date of Inspection	09/06/2022
Prepared by	Nick Davis, MSc MRICS Kilmarnock - Allied Surveyors Scotland Plc

SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\overline{\Omega}$

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

¹ Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller:
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

² Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an

arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- *There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ *There are no particularly troublesome or unusual legal restrictions;
- *There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a substantial semi-detached and extended two storey character house.
Accommodation	First floor: Entrance lobby, drawing room, dining room, dining kitchen, TV room, bedroom, utility room, shower room with WC and cloakroom with WC. Upper floor: Gallery landing, four bedrooms (master with en suite bathroom and open plan dressing area), study and two shower rooms.
Gross internal floor area (m2)	354 sq.metres approximately.
Neighbourhood and location	The subjects are situated within a semi rural location, set a short drive from the outskirts of Kilmarnock. The subjects form part of a small cluster of properties, of broadly similar age, although mixed style. Woodland and agricultural land also surrounds the property.
	Most local amenities are readily available within a short drive.
Age	Originally constructed around the late 1800's, with various extensions and alterations carried out thereafter.
Weather	Dry and overcast. Period of mixed weather prior to inspection.
Chimney stacks	Visually inspected with the aid of binoculars where required.

	Chimney heads are of brick and stone design, partly finished with render and protected at roof level by lead/similar apron flashings. No flue linings inspected or tested.
Roofing including roof	Sloping roofs were visually inspected with the aid of
space	binoculars where required. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms.
	The main roof is pitched, timber framed and overlaid in slate, incorporating metal ridge details.
	Limited inspection of the main attic void revealed the structure to be of a timber frame design, incorporating timber sarking.
	Insulation material, roof design and part chipboard flooring restricted inspection severely, to area immediately surrounding hatch.
	Single storey projection at side formed in similar materials to main roof, with no access void formed.
	Small flat felt/similar section noted over rear hallway and cloakroom area at ground level.
Rainwater fittings	Visually inspected with the aid of binoculars where required.
	Rainwater fittings are formed in a combination of parapet style, assumed to be lead/similar lined, together with some cast iron goods and one or two PVC components.

	Understandably our sight was severely limited with regard to parapet arrangements.
Main walls	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.
	The main outer walls are of solid stone design, blonde/tan in colour, dressed at principle elevation, with areas of painted render thereafter.
	Some solid brick outer walls also noted at rear elevations.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were not forced open.
	Windows are a combination of single glazed timber sash and case style, together with a number of replacement double glazed PVC units.
	One or two skylight style units also noted.
	Front entrance door is composite/PVC clad and part glazed.
	Rear entrance door is of hardwood timber style.
External decorations	Visually inspected.
	Painted cast iron goods and external timber joinery, together with render.
Conservatories / porches	No conservatories or porches.
Communal areas	No internal communal circulation areas.
Garages and	Visually inspected.
permanent outbuildings	A small number of detached timber/felt structures noted within rear garden grounds, used for rough storage purposes only.
	Detached summerhouse structure set within rear grounds, of a brick design, surmounted by a PVC/similar super structure, double glazed in part. The summerhouse incorporates a masonry chimney breast with heat provided by solid fuel stove. We are informed that a water supply serves the property.

	1	
Outside areas and boundaries	Visually inspected.	
	The subjects occupy a generous plot, irregular in shape.	
	Access to the property is taken via a shared access roadway, serving subjects and neighbouring dwellings.	
	In general terms boundaries are formed in areas of timber fencing, mature hedgerow and trees, together with areas of masonry and metal boundary details.	
	Grounds are overlaid in areas of lawn, gravel, decorative hardstandings and flower bed.	
	Woodland areas noted in and aroudn the feu. Understandably we were unable to inspect all areas within the curtilage.	
	Confirm exact extent of boundaries and any associated acreage by reference to title deeds,	
Ceilings	Visually inspected from floor level.	
	Ceilings are of lath and plaster and plasterboard lined style.	
Internal walls	Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
	Internal walls are lath and plaster and plasterboard lined, with a number of solid sections also.	
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.	
	Flooring at ground level is a combination of solid and suspended timber design, overlaid in a mixture of fixed coverings.	
	Flooring at upper level is entirely of suspended timber	

	design.	
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances.	
	Internal joinery and door surrounds are of mixed age and style, incorporating both traditional hardwood timber goods and some soft wood painted timber goods.	
	A decorative stone stair leads from ground to upper level, with wrought iron and timer balustrade details.	
	Kitchen fittings comprise a contemporary range of wall and base mounted units incorporating a stainless steel sink.	
	No comment can be made that internal glazing panels are of toughened or safety glass.	
Chimney breasts and fireplaces	Visually inspected. No testing of the flues or fittings was carried out.	
	A number of open fires and chimney breasts noted. Operational and non operational fireplaces should be confirmed by vendor.	
Internal decorations	Visually inspected.	
	The property is finished with areas of paper, emulsion and tile, together with some decorative timber linings.	
Cellars	Visually inspected where there was safe and purpose-built access.	
	Basement/cellar accessed via hallway off kitchen. Earth and tiled floor, with stone walls and a timber ceiling.	
	Timber supporting columns noted.	
	No natural light is available.	
	Boiler and hot water cylinder located within this area.	
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.	

	Mains electricity supply. The electrical fuse box features circuit breaker fuses and where visible exposed wiring is encased in PVC connected to 13 amp power points some of which are skirting mounted.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. No gas supply.
Water, plumbing and bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances. Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric. Mains water supply. Plumbing where visible is of copper and PVC style. Sanitary fittings are of a modern and contemporary style throughout, with shower rooms comprising shower compartment, WC and wash hand basin. Master bathroom features free standing bath, double shower compartment, wc and wash hand bain.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances. Space heating is provided by a floor mounted oil fired boiler, located within the cellar/basement area. This serves water filled radiators to the main apartments. Hot water is provided via a foam insulated cylinder located within the same area.

	Background heating is available via a range of open fireplaces.
	An electric storage heater was evident within the TV room.
Drainage	Drainage covers etc were not lifted. Neither drains nor drainage systems were tested.
	Shared septic tank, understood to be set within subjects grounds. This should be confirmed.
Fire, smoke and burglar alarms	Visually inspected. No tests whatsoever were carried out to the system or appliances. The new Fire and Smoke Alarm Standard came in to force in February 2022. This new standard requires a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance such as a boiler, open fire or wood burner a carbon monoxide detector is also required. The purchaser should satisfy themselves in this regard. A number of ceiling mounted smoke detectors were noted. We are informed by vendor that additional detectors will be fitted in coming days. Further information available via vendor. It would appear that an intruder alarm is present. This should be confirmed.
Any additional limits to	No access was gained above ceiling linings or behind fixed timber goods or sanitary ware.
inspection	We have not tested all window/doors and associated handles to avoid excessive physical contact.
	We have not inspected the entirety of the feu.
	An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best

undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive. Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category:	1
Notes:	There is notable evidence of settlement and movement throughout the property, reflected in the form of external masonry distortion, together with areas of plaster cracking internally. Furthermore, runs and dips were noted to flooring in places. On the basis of a single inspection the aforementioned movement would appear to be within a tolerable limit and not out of character for properties of this age and style.

Dampness, rot and infestation	
Repair category:	2
Notes:	Positive moisture readings were obtained around a ground and first floor window reveal. We are informed that localised repairs have been carried out, and these areas should be closely monitored during "drying out process". Additional repairs may be still be required. Positive moisture readings were obtained to lower wall linings within ground floor cloakroom area. The cause of this should be traced and repaired as required. Woodworm boreholes were evident to some timbers within the cellar/basement area. In the absence of valid guarantees for previous treatment works, further advice can be obtained via a reputable timber and damp specialist. We are informed that some woodworm treatment has been applied

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

by the vendor, however understandably no guarantee documentation will exist.

Given the age and scale of property, it would be prudent to instruct and timber and damp specialist to provide advice on any necessary or recommended treatment works.

Chimney stacks	
Repair category:	2
Notes:	General wear and tear and weathering noted to chimney heads, together with pockets of frost action and localised erosion.
	Chimneys are of an age and style which will require regular and ongoing maintenance.
	We have not inspected chimneys or flue linings.
	Localised staining within roof space around chimney breast/head reinforces requirement for ongoing and current maintenance.

Roofing including roof space	
Repair category:	2
Notes:	The main roof, together with side projection roof displays a degree of misalignment and general wear and tear to slates.
	Stained sarking boards and a number of corroded nail heads were evident within the roof space, reinforcing requirement for a degree of regular maintenance.
	It was noted that felt/similar coverings have been replaced over bay projection to front, and rear hall/cloakroom projection.
	Weathering and wear and tear noted to flat roof covering over

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

cloakroom area. Flat roof coverings have a more limited lifespan.

Rainwater fittings	
Repair category:	2
Notes:	Parapet arrangements can be prone to leakage if not regularly maintained and checked. It would appear that these features have leaked at some stage, given pattern of staining to drawing room bay projection and at first floor master bedroom window reveals. It would be prudent to check and repair as required. Thereafter, general wear and tear was noted. Rainwater goods should be maintained clear of obstruction at all times in order to provide adequate rainwater disposal.

Main walls	
Repair category:	2
Notes:	Weathering and wear and tear noted to external wall finishes, together with pockets of erosion and frost action to stone work.
	Some sections of render noted to be losing key with sub structure masonry.
	Routine maintenance expenditures will be an ongoing requirement.
	Again, evidence of some settlement/movement identified to external masonry.

Windows, external doors and joinery	
Repair category:	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

	2
Notes:	Mixed age and style window units, with older single glazed units displaying wear and tear framework.
	Some general user wear and tear noted to PVC double glazed units.
	Potential purchasers may wish to budget for a programme of upgrade.

External decorations	
Repair category:	1
Notes:	The property was found to be in good external decorative order, with some fresh/recent paintwork identified.

Conservatories / porches	
Repair category:	
Notes:	No conservatories or porches.

Communal areas	
Repair category:	
Notes:	No internal communal circulation areas.

Garages and permanent outbuildings

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	2
Notes:	General weathering and wear and tear evident to masonry summerhouse structure, together with frost action/damage to chimney head details. This may require localised repair.
	Internally, some damp staining was noted at lower walls and around upper wall linings.
	A number of misted double glazed window units were identified, together with missing internal pane to entrance door. Repairs/replacement will be required.
	Again, we have not tested the heating or water system connected to this structure.

2
Neat and tidy garden grounds, presented to a high standard.
Rights of way and any maintenance liabilities regarding access roadway should be confirmed by reference to title deeds.
Mature trees and bushes may require professional advice from time to time. We are unaware of any tress preservation orders and this should be confirmed.
Some misaligned timber fencing was identified in places, together with general wear and tear to masonry boundaries.
Understandably, given the extent of grounds, we have not inspected all areas.
Boundaries and any acreage should be crossed referenced to title deeds.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

We are informed that a small section of grounds at rear, bound by timber fencing does not pertain to subjects title. Whilst this is modest, this detail should be fully confirmed by reference to title deeds, together with any rights of access.

We are unaware of any tree preservation orders which may exist.

Ceilings	
Repair category:	2
Notes:	Some plaster cracking and wear and tear noted, together with a small number of stained ceiling linings, indicating historic moisture ingress. We are informed this has been repaired and these areas should be monitored during drying out process. Again, the aforementioned areas of plaster cracking may require localised replastering.

Internal walls	
Repair category:	2
Notes:	General plaster wear and tear noted, commensurate with age and style.
	Again, the aforementioned areas of plaster cracking and localised moisture readings may require replastering.
	Monitor during "dry out process".

Floors including sub-floors	
Repair category:	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	Some runs and dips noted to flooring, indicative of historic settlement.
	Weight testing of flooring at random at various points throughout the property proved it to be generally level and well supported.

Internal joinery and kitchen fittings	
Repair category:	1
Notes:	Generally well maintained and presented joinery items, displaying localised user wear and tear. We would highlight that asbestos cement/similar panelling was identified to rear of cellar entrance doorway, and to rear of central heating boiler. These materials should be ,handled with care and not disturbed. If removal is required this should be done so by a licensed contractor.

Chimney breasts and fireplaces	
Repair category:	2
Notes:	Mixed age and style chimney breasts and fireplaces, with some mid range moisture readings obtained in places. Whilst not uncommon for age and character of property, it may be prudent to conduct investigations in this regard.

Internal decoration	ons
Repair category:	1
Notes:	The property was found to be in generally good internal decorative order, however some stained plasterwork was noted, as previously

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

mentioned.
Some selective decoration may be required.

Cellars		
Repair category:	2	
Notes:	Penetrating dampness noted to some wall linings, broadly commensurate with age and style. Monitor and repair if required.	
	Gneral wear and tear noted to timber goods.	
	Our inspection was restricted to this area, due to stored items.	
	Scattered woodworm boreholes noted, as detailed within dampness section. Again, we are informed some timbers have treated by vendor, without guarantee.	

Electricity		
Repair category:	1	
Notes:	It is acknowledged that upgraded consumer units and circuit breaker systems have been installed in recent times.	
	Some older style wiring was noted, particularly within the cellar, however we are informed that this is redundant. We have not tested any wiring.	
	It is recommended that electrical systems are checked and tested every five years in order to keep up to date with current safety requirements.	
	No evidence is available to confirm recent testing or servicing. Failure to test the service regularly increases safety risks. Ideally a current test certificate should be made available.	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Gas	
Repair category:	2
Notes:	No gas supply.
	The location of the oil tank, immediately adjacent to rear boundary walling, would not comply with current regulations in force. Further advice should be obtained on whether the tank requires to be relocated.

Water, plumbing and bathroom fittings		
Repair category:	1	
Notes:	Where visible plumbing appears serviceable.	
	Again, it should be confirmed that no concealed plumbing defects exist within ground floor cloakroom, given positive moisture readings obtained at lower wall linings.	
	It should be confirmed that the water supply is via a public pipe.	

Heating and hot water		
Repair category:	2	
Notes:	The central heating boiler and associated hot tank are along older style lines.	
	We understand the system has been regularly serviced.	
	Increasing levels of maintenance will be required.	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Drainage		
Repair category:	1	
Notes:	The exact location of the septic tank, together with access and maintenance responsibilities should be confirmed. any appropriate SEPA/similar documentation in this regard should also be made available. We have not inspected or tested the system.	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information

Heating and hot water	2
Drainage	1

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground and first	
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES []NO	
3. Is there a lift to the main entrance door of the property?	[]YES [x]NO	
4. Are all door openings greater than 750mm?	[]YES [x]NO	
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES []NO	
6. Is there a toilet on the same level as a bedroom?	[x]YES []NO	
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO	
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES []NO	

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The property has been historically altered/adapted to provide current layout and footprint. It should be confirmed all alterations were done so in accordance with any necessary permissions, warrants and consents required at the appropriate time.

It should be confirmed that the subjects is not a listed building, or situated within a conservation area.

Confirm the exact extent of boundaries by reference to title deeds, together with liabilities and access arrangements with regards to access roadway.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Estimated re-instatement cost (£) for insurance purposes

1,250,000

One Million Two Hundred and Fifty Thousand Pounds. It should be appreciated that due to size, style and listing of the property, that estimates detailed are only an opinion of minimum reinstatement figure and that further enquiries should be made to ensure adequate cover is in place.

Valuation (£) and market comments

600.000

Taking current market conditions into account together with points detailed within our report we are of the opinion that the current market value of the heritable property is fairly stated in the capital sum of SIX HUNDRED THOUSAND POUNDS.

Report author:	Nick Davis, MSc MRICS		
Company name:	Kilmarnock - Allied Surveyors Scotland Plc		
Address:	91 John Finnie Street Kilmarnock KA1 1BG

Date of report:	09/06/2022

P A R T 2.

MORTGAGE VALUATION REPORT

Includes a market valuation of the property.

Property: Borland House Kilmarnock KA3 6BW Date of Inspection: 09/06/2022 Reference: M/9796 Mortgage Valuation Report Client: Mr & Mrs. J & I Doig Tenure: Feudal M/9796

This report has been prepared as part of your instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising your lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

1.0 LOCATION

The subjects are situated within a semi rural location, set a short drive from the outskirts of Kilmarnock. The subjects form part of a small cluster of properties, of broadly similar age, although mixed style.

Woodland and agricultural land also surrounds the property.

Most local amenities are readily available within a short drive.

2.0	DESCRIPTION	2.1 Age:	Originally constructed around the late 1800's, with various extensions and	
			alterations carried out thereafter.	

The subjects comprise a substantial semi-detached and extended two storey character house.

3.0 CONSTRUCTION

The outer walls are a combination of solid stone and solid brick design, part rendered. Roofs are pitched, timber framed and slated.

4.0 ACCOMMODATION

First floor: Entrance lobby, drawing room, dining room, dining kitchen, TV room, bedroom, utility room, shower room with WC and cloakroom with WC.

Upper floor: Gallery landing, four bedrooms (master with en suite bathroom and open plan dressing area), study and two shower rooms.

5.0	SERVICES (N	ERVICES (No tests have been applied to any of the services)						
Water:	Mains	Electricity:	Mains	Gas:	No connection	Drainage:	Shared septic tank	
Central Heating: Oil fired								
6.0	OUTBUILDIN	igs						
Garage:		None.	None.					
Others:		Detached sum	nmerhouse struc	cture and timbe	r storage units.			
7.0	GENERAL CONDITION - A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.					or inaccessible. illure to rectify ects arising. Ivised to seek ding with the		
		have been adec						
masonry disto in places. On t	There is notable evidence of settlement and movement throughout the property, reflected in the form of external masonry distortion, together with areas of plaster cracking internally. Furthermore, runs and dips were noted to flooring in places. On the basis of a single inspection the aforementioned movement would appear to be within a tolerable limit and not out of character for properties of this age and style.							
repairs have b	Positive moisture readings were obtained around a ground and first floor window reveal. We are informed that localised repairs have been carried out, and these areas should be closely monitored during "drying out process". Additional repairs may be still be required.							
	Positive moisture readings were obtained to lower wall linings within ground floor cloakroom area. The cause of this should be traced and repaired as required.					se of this

None								

Nil

8.1 Retention recommended:

9.0	ROADS &FOOTPATHS				
Made up and liabilities.	Made up and adopted, with shared access road providing direct access to the property. Confirm rights of way and liabilities.				
10.0	BUILDINGS INSURANCE (£):	1,250,000 .One Million Two Hundred and Fifty Thousand Pounds. It should be appreciated that due to size, style and listing of the property, that estimates detailed are only an opinion of minimum reinstatemen t figure and that further enquiries should be made to ensure adequate cover is in place.	GROSS EXTERNAL FLOOR AREA	400	Square metres
	This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.				
11.0	GENERAL REMARKS				
The property has been historically altered/adapted to provide current layout and footprint. It should be confirmed all alterations were done so in accordance with any necessary permissions, warrants and consents required at the appropriate time.					
It should be confirmed that the subjects is not a listed building, or situated within a conservation area.					
Confirm the exact extent of boundaries by reference to title deeds, together with liabilities and access arrangements with regards to access roadway.					
Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.					
12.0	VALUATION On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain				

asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if

SIX HUNRED THOUSAND POUNDS.

they have any concerns then they should ask for a specialist to undertake appropriate tests.

P A R T 3 .

ENERGY REPORT

A report on the energy efficiency of the property.

energy report

energy report on:

Property address	Borland House Kilmarnock KA3 6BW
Customer	Mr & Mrs. J & I Doig
Customer address	Borland House Kilmarnock KA3 6BW
Prepared by	Nick Davis, MSc MRICS Kilmarnock - Allied Surveyors Scotland Plc

Energy Performance Certificate (EPC)

Dwellings

Scotland

BORLAND HOUSE BORLAND, GLASGOW ROAD, KILMARNOCK, KA3 6BW

Dwelling type: Semi-detached house

Date of assessment:09 June 2022Date of certificate:09 June 2022Total floor area:354 m²

Primary Energy Indicator: 295 kWh/m²/year

Reference number: 0100-2551-6160-2802-8371 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

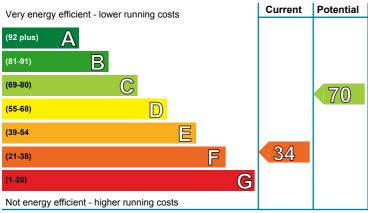

Main heating and fuel: Boiler and radiators, oil

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£12,282	See your recommendations
Over 3 years you could save*	£5,937	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

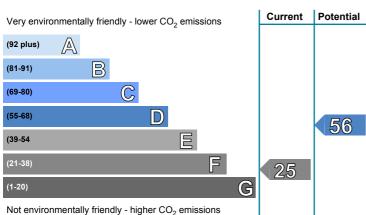

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band F (34)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band F (25)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal or external wall insulation	£4,000 - £14,000	£3006.00
2 Floor insulation (suspended floor)	£800 - £1,200	£948.00
3 Draughtproofing	£80 - £120	£255.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
Roof	Pitched, 250 mm loft insulation Pitched, 200 mm loft insulation	**** ****	**** ****
Floor	Suspended, no insulation (assumed)	_	_
Windows	Partial double glazing	***	***
Main heating	Boiler and radiators, oil	***	***
Main heating controls	Programmer, room thermostat and TRVs	****	★★★★ ☆
Secondary heating	Room heaters, coal	_	_
Hot water	From main system	***	***
Lighting	Low energy lighting in 89% of fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 85 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 30 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 16 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£11,181 over 3 years	£5,415 over 3 years	
Hot water	£561 over 3 years	£384 over 3 years	You could
Lighting	£540 over 3 years	£546 over 3 years	save £5,937
Total	s £12,282	£6,345	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Da	assumented massives	Indicative cost	Typical saving	Rating after improvement	
Re	commended measures	indicative cost	per year	Energy	Environment
1	Internal or external wall insulation	£4,000 - £14,000	£1002	E 50	F 37
2	Floor insulation (suspended floor)	£800 - £1,200	£316	D 55	E 42
3	Draughtproofing	£80 - £120	£85	D 56	E 43
4	Replace boiler with new condensing boiler	£2,200 - £3,000	£460	D 65	E 51
5	Replace single glazed windows with low- E double glazed windows	£3,300 - £6,500	£115	D 67	E 53
6	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£328	C 70	D 56

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

3 Draughtproofing

Fitting draughtproofing, strips of insulation around windows and doors, will improve the comfort in the home. A contractor can be employed but draughtproofing can be installed by a competent DIY enthusiast.

4 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

5 Double glazed windows

Double glazing is the term given to a system where two panes of glass are made up into a sealed unit. Replacing existing single-glazed windows with double-glazed windows will improve comfort in the home by reducing draughts and cold spots near windows. Double-glazed windows may also reduce noise, improve security and combat problems with condensation. Building regulations apply to this work and planning permission may also be required, so it is best to check with your local authority on what standards need to be met. A building warrant is not required if the windows comply with the current requirements.

6 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	56,286	N/A	N/A	(15,317)
Water heating (kWh per year)	3,079			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Nicholas Davis

Assessor membership number: EES/022444

Company name/trading name: Allied Surveyors Scotland Plc

Address: 91 John Finnie Street

Kilmarnock KA1 1BG

Phone number: 01563 572341

Email address: kilmarnock@alliedsurveyors.com

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

BORLAND HOUSE BORLAND, GLASGOW ROAD, KILMARNOCK, KA3 6BW 09 June 2022 RRN: 0100-2551-6160-2802-8371 Recommendations Report

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
