Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

SINGLE Survey

A report on the condition of the property, with categories being rated from 1 to 3.

Single Survey

Survey report on:

Surveyor Reference	PD/8308
Customer	Kirsty Calder
Selling address	7 Shilton Lane Bishopton PA7 5PR

Date of Inspection	11/03/2025

Prepared by	Ross Carpenter, Bsc (Hons) MRICS
	Paisley - Allied Surveyors Scotland Ltd

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\overline{\mathcal{M}}$

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

¹ Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 **DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

² Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 – DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 <u>Category 1</u>: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- *There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- *There are no particularly troublesome or unusual legal restrictions;
- *There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a linked, extended, detached house.
Accommodation	Ground Floor - Entrance porch, Entrance hallway, Living and Dining Room with rear Conservatory off, Kitchen leading to Utility Room with office off and Cloakroom with wc.
	First Floor - Hallway Landing, 3 Bedrooms and Family Bathroom with wc.
Gross internal floor area (m2)	Approximately 115 square metres, excluding conservatory.
Neighbourhood and location	The subjects are located on the periphery of Bishopton. The immediately surrounding area is partly developed with properties of similar character and open fields. All usual residential amenities and transport links are available within a short drive.
Age	Estimated to be around 50 years.
Weather	At the time of inspection it was dry and bright.
Chimney stacks	The subjects are served by a brick built chimney which is part finished in facing brick and partly in render.
	Within the conservatory and leading up to the rear elevation there is a stainless steel flue serving the wood burning fire.
	Visually inspected with the aid of binoculars where required.

Roofing including roof space	The main roof is predominantly pitched and overlaid in slates. Over the side projection there is a section of flat roof overlaid in felt and over the side porch the roof is pitched and overlaid in concrete tiles.
	Access was obtained to the roof void through a hatch located within the ceiling of the hallway landing. The roof structure appears to have been fully lined internally with only very limited sight of the structure possible. Inspection within this area was further restricted due to a large number of stored personal items and chimney stack which runs through the void.
	Sloping roofs were visually inspected with the aid of binoculars where required.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so. Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
	Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms.
Rainwater fittings	The rainwater conductors and downpipes are formed in PVC.
	Visually inspected with the aid of binoculars where required.
Main walls	The main outer walls are of traditional cavity brick/block construction, finished externally in roughcast.
	The side projection containing the utility room also appears to be of traditional cavity brick construction with matching roughcasting finishes. The rear projection off the utility room appears to be of lightweight timber framed construction, predominantly finished externally in shiplap PVC panelling.
	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.

Windows, external doors and joinery	Windows through are of uPVC framed, double glazed units.
and joinery	The front entrance door to the porch is formed in composite with double glazed panels and within the study there is a composite door leading to the rear garden.
	The property has a number of uPVC framed, double glazed double doors throughout serving the doors to the utility room, 2 sets within the living room and dining room. There are 2 further sets within the conservatory leading to the garden grounds.
	The soffit and fascia boards are formed in PVC or timber.
	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
External decorations	Painted finishes to masonry, metal work and timbers.
	Visually inspected.
Conservatories / porches	The subjects benefit from an entrance porch to the gable and a large conservatory to the rear.
	These both appear to have been formed in brick sub structures, finished externally in roughcast.
	The porch has uPVC framed, double glazed window units and a pitched roof overlaid in concrete tiles.
	The conservatory is of a PVC super structure with double glazed glass units to the roof structure.
	Visually inspected.
Communal areas	There are no communal areas.
Garages and permanent outbuildings	To the gable elevation there is a large garden store. No internal inspection was undertaken.
	We further understand that the subjects benefit from a single car lockup located adjacent to the site. This was not inspected.
	Visually inspected.
Outside areas and boundaries	The subjects benefit from private garden grounds to the front, gable and rear elevations. These areas are given over to a monoblock driveway providing off street parking, paved pathways, timber decking, grass, gravel, concrete hard standing and woodchip.
	Boundary definition varies between timber fencing, hedging and blockwork walls.
	Visually inspected.
Collingo	The ceilings are formed in plasterboard.
Ceilings	

Internal walls	The internal walls are formed in hard plaster or plasterboard. Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
Floors including sub floors	Flooring throughout is predominantly of suspended timber joist construction. Within the utility room and study, flooring is of solid concrete construction. At the time of inspection the house was fully furnished and fitted with floor coverings throughout and as such, no detailed sight of the flooring was possible.
	No access to any sub floor void was found. The sub floor area has not been inspected
	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
Internal joinery and kitchen	Typical traditional internal joinery to doors, surrounds and skirtings, etc.
fittings	The kitchen fittings comprise a range of wall and floor mounted storage units and work surfaces which incorporate a sink and draining board.
	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
Chimney breasts and fireplaces	Within the living room there is a fireplace with surround with an open hearth. Within the conservatory, there is a solid wood burning stove.
	Visually inspected. No testing of the flues or fittings was carried out.
Internal decorations	Internally, walls and ceilings are finished paper, paint, tile or timber. <i>Visually inspected.</i>
Cellars	There are no cellars.
Electricity	Mains supply. The consumer unit is wall mounted within the under stairs cupboard.
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.

	Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in
	Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in
	No tests whatsoever were carried out to the system or appliances.
	and fittings without removing any insulation.
	Visual inspection of the accessible pipework, water tanks, cylinders
	The family bathroom facilities comprise a wash hand basin, wc, bath and shower cubicle with wall mounted shower head.
	The cloakroom facilities comprise a wash hand basin and wc.
bathroom fittings	formed in copper or PVC.
Water, plumbing and	Mains water supply. Where visible, sections of plumbing were seen to be
	services are turned off, the Surveyor will state that in the report and will not turn them on.
	services are turned off, the Surveyor will state that in the report and

	system or appliances. Visual inspection does not assess any services to make sure they
	removing fittings. No tests whatsoever were carried out to the
	Accessible parts of the system were visually inspected without

Fire, smoke and burglar alarms	The subjects benefit from several smoke alarms. <i>Visually inspected.</i> <i>No test whatsoever were carried out to any systems or appliances.</i> There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required. The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022. We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.
Any additional limits to inspection	 An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive. Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 38 Floorboards
- (39) Water tank
- (40) Hot water tank

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movemen	t
Repair category:	
Notes:	Within the limits of a single site inspection there is no evidence to suggest that the subjects have been adversely affected by structural movement.

Dampness, rot and infestation		
Repair category:	2	
Notes:	Meter readings were taken at random intervals to wall linings throughout. Where tested, no obvious or significant ongoing dampness, rot or infestation was noted throughout main apartments.	
	Within the roof void however, we did note elevated meter readings to the chimney stack and this area should be monitored with future repairs anticipated.	

Chimney stacks	
Repair category:	2
Notes:	The external visible chimney stack is affected by weathering and staining.
	As stated above, within the roof void, elevated meter readings were identified and future repairs may be anticipated. This area should be monitored with future repairs anticipated.

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Roofing including roof space		
Repair category:	2	
Notes:	The roof covering is generally aged. An ongoing programme of monitoring, maintenance and re-active repairs should be anticipated, typical for a property of its age and type.	
	The subjects incorporate sections of flat roof. Flat roofs have inherently short lives and can be prone to sudden failure.	
	Within the roof void, as previously stated, sections of the structure were not visible due to linings. Some historic staining was noted, where visible.	

Rainwater fittings	
Repair category:	
Notes:	Some sections of guttering were seen to be partly off level and ongoing monitoring and maintenance should be anticipated.
	Due to the weather conditions at the time of inspection, we cannot fully comment on the adequacy or otherwise of the rainwater conductors and these should be monitored under adverse weather conditions.

Main walls	
Repair category:	
Notes:	Wall finishes are affected by some general aged weathering and staining. Ongoing monitoring and maintenance should be anticipated, typical for a property of its age and type.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Windows, external doors and joinery		
Repair category:	2	
Notes:	Window units throughout are mid aged and, where tested, are in need of some general easing of mechanisms in order to re-gain smooth operation.	
	The front and rear entrance composite doors are of modern design and, where tested, there were no obvious or significant defects noted.	
	The front fascia appears to have been renewed in PVC in recent years. Nonetheless, to the gable and rear elevations, the eaves, soffit and fascia boards are affected by general weathering with holed and decayed sections. Future consideration for replacement to these areas should be undertaken.	
	Double glazing, particularly uPVC double glazing, can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance repairs will be required as part of an ongoing maintenance programme. Our valuation does assume that the installation of the windows does comply with the necessary regulations at the time of installation.	

External decorations	
Repair category:	
Notes:	Generally weathered.

Conservatories / porches		
Repair category:		
Notes:	No obvious or significant defects were noted to the side porch or the conservatory. During the vendor's ownership in recent years, we understand the roofing structure to the conservatory has been renewed and the hopper windows have all been replaced. Any documentation or guarantees in relation to this ideally should be provided	

Communal areas	
Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Garages and permanent outbuildings	
Repair category:	2
Notes:	The outbuilding appeared to have been affected by general aged weathering and undulations noted to the roof covering.

Outside areas and boundaries	
Repair category:	2
Notes:	The garden grounds were seen to be in need of some general maintenance and upkeep with decayed and loose sections of timbers to decking and in the shorter term, some replacement of sections should be anticipated.
	The garden grounds elsewhere were seen to be affected by undulations with some landscaping anticipated to personal taste.
	Areas of the boundaries are affected by general wear and tear with some off level and damaged sections of fencing. The extent of the rear boundary was not fully inspected, given the large sections of vegetation to the rear.

Ceilings	
Repair category:	
Notes:	Ceiling finishes are affected by minor blemishes and shrinkage cracking.

Internal walls	
Repair category:	
Notes:	Internal walls are affected by some minor blemishes.

Floors including sub-floors	
Repair category:	
Notes:	Some general wear and tear was noted to the hardwood flooring at ground floor level, particularly in relation to the living. The re-fixing of some flooring may be anticipated.

7 Shilton Lane, Bishopton, PA7 5PR

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Internal joinery and kitchen fittings	
Repair category:	
Notes:	Some general wear and tear was noted throughout.

Chimney breasts and fireplaces	
Repair category:	
Notes:	Any documentation in relation to the installation of the wood burner and the flue which serves it should be provided, as well as any safety certification.

Internal decorations	6
Repair category:	
Notes:	The subjects appear adequately presented throughout.
	It was noted that some ceilings are finished in textured paint. Earlier brands of this material contained asbestos fibres and, without carrying out a disruptive test, it is not possible to confirm whether such materials are present.

Cellars	
Repair category:	
Notes:	Not applicable.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Electricity	
Repair category:	2
Notes:	The consumer unit is of an older style and the system should now be tested by a suitably qualified electrical engineer and upgrades carried out where recommended. An incoming purchaser should satisfy themselves in relation to these works.
	It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/ SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IEE regulations.

Gas	
Repair category:	
Notes:	The valuation assumes that the gas installation complies with current Gas Safe standards.

Water, plumbing and bathroom fittings				
Repair category:				
Notes:	No obvious or significant defects were noted to visible sections of plumbing.			
	The sanitary fittings appear to be affected by some wear and tear.			

Heating and hot water				
Repair category:	1			
Notes:	It is understood the central heating boiler was installed circa 2019. Where visible, at the time of our inspection, no obvious or significant defects were noted to the system. Any documentation in relation to the installation of the boiler and servicing history should ideally be made available. Should none be forthcoming, the boiler should now be serviced by a suitably qualified Gas Safe registered engineer.			

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Drainage	
Repair category:	
Notes:	The valuation assumes that the septic tank complies with SEPA regulations.
	Details relating to its maintenance should be confirmed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	1
Dampness, rot and infestation	2

Heating and hot water	1
Drainage	1

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres</u>: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground and first
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES []NO
3. Is there a lift to the main entrance door of the property?	[]YES [x]NO
4. Are all door openings greater than 750mm?	[]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES []NO
6. Is there a toilet on the same level as a bedroom?	[x]YES []NO
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES []NO

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

A number of alterations have been undertaken to form the subjects into their present layout. We understand these have involved the formation of the utility room creating the linked area to what was formerly a detached property. In addition to this, a lightweight timber frame extension has been formed to the rear. A conservatory and the side porch have also been formed. Any Local Authority documentation available in relation to these works should ideally be provided.

We understand that Shilton Lane is privately owned and maintained by the proprietors. Further clarification as to the maintenance liabilities in relation to these should be confirmed.

Confirmation of ownership of the single car lockup should be undertaken with reference to the Title.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Estimated re-instatement cost (£) for insurance purposes

£260,000 (Two Hundred and Sixty Thousand Pounds).

Valuation (£) and market comments

The market value of the property in its present condition and with vacant possession is £300,000 (Three Hundred Thousand Pounds).

Report author:	Ross Carpenter, Bsc (Hons) MRICS
Company name:	Paisley - Allied Surveyors Scotland Ltd

PART 2.

MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Mortgage Valuation Report

			-			
Property:	7 Shilton Lane Bishopton	Client: Kirsty Calder				
	PA7 5PR	Tenure: Own	Tenure: Ownership			
Date of Inspection:	11/03/2025	Reference:	PD/8308/RC/KG			

This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

1.0 LOCATION

The subjects are located on the periphery of Bishopton. The immediately surrounding area is partly developed with properties of similar character and open fields. All usual residential amenities and transport links are available within a short drive.

2.0	DESCRIPT	ION		2.1 Age:	Estimated to be around 5 years.)	
The subject	ts comprise a l	nked, extended,	detached hou	se.	years.

6.0	OUTBUILDINGS						
0.0	Garage: Single car lock up, off-site						
		Single car loc	k up, off-site				

7.0 **GENERAL CONDITION -** A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.

At the time of inspection, undertaken for Home Report purposes, the building's external fabric was seen to be in need of a general ongoing programme of maintenance, typical for a property of its age and type. Particular attention to the ageing roof covering and ongoing maintenance should be anticipated.

An incoming purchaser can anticipate some general landscaping and upgrading to the garden grounds to personal taste.

Internally, the subjects appear to have been adequately maintained however, some attention should be brought to the electrical installation for which some consideration for upgrading should be undertaken.

8.0	ESSENTIAL REPAIR WORK (as a condition of any mortgage or, to preserve the condition of the property)

7 SHILTON LANE, BISHOPTON, PA7 5PR

Dwelling type:	Semi-detached house
Date of assessment:	11 March 2025
Date of certificate:	11 March 2025
Total floor area:	115 m²
Primary Energy Indicator:	276 kWh/m ² /year

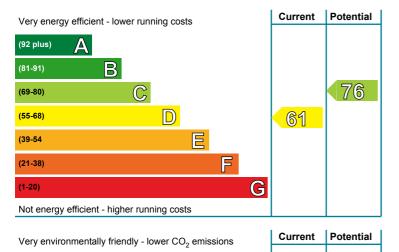

Reference number: Type of assessment: Approved Organisation: Main heating and fuel: 0160-2869-6070-2295-7621 RdSAP, existing dwelling Elmhurst Boiler and radiators, mains gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,412	See your recommendations
Over 3 years you could save*	£957	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (61)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

75

59

Recommended measures	Indicative cost	Typical savings over 3 years
1 Flat roof or sloping ceiling insulation	£850 - £1,500	£210.00
2 Cavity wall insulation	£500 - £1,500	£618.00
3 Solar water heating	£4,000 - £6,000	£129.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282. THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, as built, no insulation (assumed)	★★ ☆☆☆	★★☆☆☆
	Timber frame, as built, partial insulation (assumed)	★★★☆☆	★★★☆☆
Roof	Flat, limited insulation (assumed)	****	*****
	Pitched, limited insulation (assumed)	$\bigstar \texttt{A} \texttt{A} \texttt{A} \texttt{A} \texttt{A}$	$\bigstar \diamond \bullet \bullet \end{array}{} \bullet \bullet \bullet \bullet \bullet \end{array}{} \bullet \bullet \end{array}{} \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet \bullet$
Floor	Solid, no insulation (assumed)	_	_
	Suspended, no insulation (assumed)	—	
Windows	Fully double glazed	★★★☆☆	★★★☆☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	Room heaters, wood logs	—	_
Hot water	From main system	★★★ ☆	★★★★☆
Lighting	Low energy lighting in all fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 44 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 5.1 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.9 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

7 SHILTON LANE, BISHOPTON, PA7 5PR 11 March 2025 RRN: 0160-2869-6070-2295-7621

Estimated energy costs for this home

Lotinated energy costs for this nome			
	Current energy costs	Potential energy costs	Potential future savings
Heating	£4,680 over 3 years	£3,852 over 3 years	
Hot water	£408 over 3 years	£279 over 3 years	You could
Lighting	£324 over 3 years	£324 over 3 years	save £957
То	tals £5,412	£4,455	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement		
		indicative cost	per year	Energy	Environment	
1	Flat roof or sloping ceiling insulation	£850 - £1,500	£70	D 63	D 61	
2	Cavity wall insulation	£500 - £1,500	£206	D 67	D 66	
3	Solar water heating	£4,000 - £6,000	£43	D 68	D 67	
4	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£398	C 76	C 75	

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

External insulation with cavity wall insulation

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Flat roof or sloping ceiling insulation

Insulating a flat roof or sloping ceiling will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation can be placed on top of the roof under the waterproof membrane and should particularly be considered when the waterproofing needs to be replaced. Further information about roof insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Cavity wall insulation

Cavity wall insulation, to fill the gap between the inner and outer layers of external walls with an insulating material, reduces heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. The insulation material is pumped into the gap through small holes that are drilled into the outer walls, and the holes are made good afterwards. As specialist machinery is used to fill the cavity, a professional installation company should carry out this work, and they should carry out a thorough survey before commencing work to ensure that this type of insulation is suitable for this home and its exposure. They should also provide a guarantee for the work and handle any building standards issues. Further information about cavity wall insulation and details of local installers can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk).

3 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

4 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present:

• Biomass secondary heating

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	19,364	(2,734)	(2,953)	N/A
Water heating (kWh per year)	2,106			

Addendum

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Assessor membership number:	Mr. Ross Carpenter EES/019508
Company name/trading name:	Allied Surveyors Scotland Ltd
Address:	43 Gauze Street
	Paisley
	PA1 1ÉX
Phone number:	0141 889 4105
Email address:	paisley@alliedsurveyors.com
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

PART 4.

PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

Property Questionnaire

Property Address

7 Shilton Lane

Bishopton
