1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

| Description | The subjects comprise a detached house. | |
|--------------------------------|--|--|
| Accommodation | Ground floor: Entrance hall, living room, dining room, kitchen/breakfa area, utility room, family room and toilet (WC and wash hand basin). | |
| Z. | First floor: Landing, master bedroom with en-suite shower room (with WC), three further bedrooms and family bathroom (with WC). | |
| Gross internal floor area (m2) | 147 square metres or thereby. | |
| Neighbourhood and location | The property is located within the Jackton district of East Kilbride, where surrounding properties are of similar design, vintage and character. | |
| Stall | Adequate local shopping, educational and transport facilities are available. | |
| Age | Approximately 15 years old. | |
| Weather | It was raining at the time of inspection. | |
| Chimney stacks | There are no chimney stacks. | |
| | | |

| Roofing including roof space | The roof is pitched and concrete tiled, with the ridge being tiled. There are valley features to the front roof slope. There is a pitched and hipped tiled roof over the rear single storey extension. There is a lean-to tiled section of roof over the front single storey projection. |
|------------------------------|---|
| | A ceiling hatch to the first floor hall, with fitted loft ladder, provides access into the roof space. The roof space is partly floored and used for storage purposes, with insulation material at joist level. No inspection was possible of the roof space over the rear single storey extension as there is no access hatch. |
| | Sloping roofs were visually inspected with the aid of binoculars where required. |
| | Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. |
| | Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms. |
| Rainwater fittings | The gutters and downpipes are formed in uPVC sections. |
| | Visually inspected with the aid of binoculars where required. |
| Main walls | The main walls are of a timber inner frame with an external leaf of facing brick. |
| | Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected. |
| Windows, external doors | The windows are of uPVC double glazed units. |
| and joinery | The front and rear entrance doors are of metal finish and double glazed, with uPVC double glazed French doors to the rear of the dining room. |
| | Not all of the windows and doors were tested. |
| | The external fascias are of uPVC. |
| | Internal and external doors were opened and closed where keys were available. |
| | Random windows were opened and closed where possible. |
| | Doors and windows were not forced open. |
| External decorations | uPVC finishes. |
| | Visually inspected. |
| Conservatories / porches | There are no conservatories nor porches. |
| Communal areas | There are no communal areas. |
| | |

| Garages and permanent outbuildings | There is no garage. The original integral garage has been converted to provide further living accommodation. |
|------------------------------------|---|
| 0 | There are no outbuildings. |
| | Visually inspected. |
| Outside areas and boundaries | There is garden to the front and rear of the property, which is a mixture of grass, concrete slabs, tarmac drive and timber decking. |
| | The boundaries are partially formed in timber fencing. |
| | Visually inspected. |
| Ceilings | The ceilings are of plasterboard |
| | Visually inspected from floor level. |
| Internal walls | The internal walls and partitions are of plasterboard. |
| | The walls within the ground floor toilet are partly tiled, with the bathroom walls being fully tiled. The walls within the en-suite shower room are partly uPVC lined. |
| | Visually inspected from floor level. |
| | Using a moisture meter, walls were randomly tested for dampness where considered appropriate. |
| Floors including sub floors | Flooring is of concrete to the ground floor and suspended timber to the first floor. Due to fitted carpets and floor coverings no detailed inspection of floors was possible and accordingly no comment can be made on their condition. |
| | No access was available to any sub-floor area. |
| | Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. |
| Internal joinery and kitchen | The internal doors, door surrounds and skirting boards are of timber. |
| fittings | The kitchen fittings comprise a range of floor and wall mounted units and are of a modern design. |
| | There are fitted units within the utility room. |
| | The staircase to first floor is of timber and carpeted, with timber handrail/banister. |
| | There are fitted wardrobes/cupboards within the bedrooms. |
| | Built-in cupboards were looked into but no stored items were moved. |
| | Kitchen units were visually inspected excluding appliances. |
| Chimney breasts and fireplaces | There are no chimney breasts nor fireplaces. |

| Internal decorations | Painted finishes. <i>Visually inspected.</i> |
|----------------------|--|
| Cellars | There are no cellars. |
| Electricity | It is assumed that the property has mains supply of electricity. The electricity meter and distribution board are contained within the under stain cupboard. |
| | Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. |
| | Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. |
| Gas | It is assumed that the property has a mains supply of gas. The gas meter is contained within an external box to the left hand side wall. |
| | Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. |
| A. | Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on. |
| Water, plumbing and | It is assumed that the property has a mains supply of cold water. |
| bathroom fittings | Plumbing where seen is a mixture of PVC and copper. |
| | The bathroom fittings comprise a four-piece suite with bath, shower cabinet and mixer shower, WC and wash hand basin. |
| | Within the master bedroom is a three-piece en-suite shower room with shower cabinet and mixer shower, WC and wash hand basin. |
| | On the ground floor is a toilet with WC and wash hand basin. |
| | There is a stainless steel sink and drainer fitted within the kitchen and utility room. |
| | Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. |
| | No tests whatsoever were carried out to the system or appliances. |
| | Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in |

| Heating and hot water | central heating bo There are thermo | the benefit of a gas fired central heat oiler is wall mounted within the family static valves to the majority of the inc nostat to the ground floor hall wall. | room cupboard. |

| | | | |

| Any additional limits to | Externally the property was viewed from ground level only. |
|--------------------------|---|
| inspection | The property was fully furnished and had fitted floor coverings, therefore no detailed inspection was possible of the floors and accordingly, no comment can be made on their condition. Internal cupboards were generally filled with storage items. No access was available beneath sanitary or kitchen fittings. |
| | Windows and external doors were not all fully opened or tested. |
| | No access was available to any sub-floor areas. |
| | Our inspection of the roof space was restricted due to insulation material, partial flooring and the amount of storage items. No inspection was possible of the roof space over the front or rear single storey projections. |
| | No inspection has been possible to flooring timbers beneath any sanitary fitting, kitchen appliances or other wet areas was possible. Timbers are assumed to be in a satisfactory condition. |
| | The cold water rising main was not fully inspectable. |
| | An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive. |
| | Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way. |

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

| Category 3 | Category 2 | Category 1 |
|------------|--|--|
| | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| Structural moveme | nt | P. | 2 |

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

14 Attlee Road, East Kilbride, Glasgow, G74 5PJ

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

| 1. Which floor(s) is the living accommodation on? | Ground and first floors |
|--|-------------------------|
| 2. Are there three steps or fewer to a main entrance door of the property? | [x]YES []NO |
| 3. Is there a lift to the main entrance door of the property? | []YES [x]NO |
| 4. Are all door openings greater than 750mm? | []YES [x]NO |
| 5. Is there a toilet on the same level as the living room and kitchen? | [x]YES []NO |
| 6. Is there a toilet on the same level as a bedroom? | [x]YES []NO |
| 7. Are all rooms on the same level with no internal steps or stairs? | []YES [x]NO |
| 8. Is there unrestricted parking within 25 metres of an entrance door to the building? | [x]YES []NO |

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The original garage has been converted to provide further living accommodation. It is assumed that all alterations, additions and/or extensions to the property have received all necessary Town Planning (Planning Permission) and Building Authority (Building Warrants and Completion Certificate) approvals and that documentation for such is available.

The property is situated in an area of past mining activity. A mining report should be obtained from the Coal Authority to provide information as to historic and future mining activity and whether the property has been the subject of any compensation claims and to confirm that the property is not adversely affected.

It is assumed that there are no statutory, town planning, road proposals or environmental matters which are likely to have an adverse effect on the property.

The road and footpath adjoining the site are made up and are assumed to be adopted by the Local Authority.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Estimated re-instatement cost (£) for insurance purposes

320,000

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £320,000 - Three Hundred and Twenty Thousand Pounds. This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation (£) and market comments

380,000

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £380,000 (Three Hundred and Eighty Thousand Pounds.

The property forms suitable security for mortgage purposes subject to the specific lending criteria of any mortgage provider.
