## **Important Notice:**

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.** 

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

PART 1.

## SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

## Single Survey

## Survey report on:

Surveyor Reference	ND/6176
Customer	Mr & Mrs. C Lewis
Selling address	72 Douglas Muir Drive
	Milngavie, Glasgow
	G62 7RJ
Date of Re- inspection	28/08/2025
Date of Original Inspection	17/03/2025
Prepared by	Gavin J Smith, Bsc Hons MRICS  Bearsden - Allied Surveyors Scotland Ltd

## SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

#### **PART 1 - GENERAL**

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. <sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\square$ 

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller:
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

## 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

## 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

## 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

## 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## **PART 2 - DESCRIPTION OF THE REPORT**

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

## 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.* 

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

**WARNING**: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

## 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	Detached three storey house with integral swimming pool and detached quadruple car garage.
Accommodation	GROUND FLOOR: Entrance hall with w.c. apartment off, open plan living room and dining room, kitchen, home office, integral swimming pool with sun lounging area and plunge pool, steam room, shower room, utility room, w.c. apartment, pump room.
	FIRST FLOOR: Landing, bedroom one with walk-in wardrobe and ensuite bathroom off, bedroom two with en-suite bathroom off, bedroom three, bedroom four, bedroom five, family bathroom including w.c.
	SECOND FLOOR: Gallery landing, bedroom six, sitting room, shower room including w.c.
Gross internal floor area (m2)	422 sq.metres approximately.
Neighbourhood and location	The property is located within the Mains Estate in Milngavie where immediate surrounding properties are of similar age, style and character. All usual residential amenities and transport links can be found within reasonable distance. Douglas Academy lies a short distance to the rear.
Age	The original house was built in 1998 with multiple extensions carried out since.
Weather	At the time of inspection, it was cold, dry and sunny.
Chimney stacks	Chimneys are of pointed brick construction with lead flashings.
	Visually inspected with the aid of binoculars where required.

Roofing including roof space	The roof is of multi-pitched design, where visible is timber framed and is overlaid in concrete tiles. No access could be gained to the roof structure due to the lack of any available access hatches and the attic accommodation.
	There is a flat roof covering at the dormer window projection to the rear which is understood to be overlaid in Zinc.
	There is canopy at the rear bay window of the dining area.
	Roof valleys and flashings, where visible, are lead.
	Sloping roofs were visually inspected with the aid of binoculars where required.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.
	Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms.
Rainwater fittings	Gutters and downpipes are plastic.
	Visually inspected with the aid of binoculars where required.
Main walls	The main walls of the original house are of cavity brick and block construction, finished externally in pointed facing brick. There are drill holes indicative of cavity wall insulation.
	The main walls of the extension are believed to be of modern timber framed construction, finished externally in pointed facing brick. There are some PVC panelled sections.
	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.
Windows, external doors and joinery	Windows are of mixed age uPVC framed or timber framed double glazed units. The units are of varying design.
	The entrance doors are of modern composite design or uPVC framed and double glazed.
	There are PVC and timber facings externally.
	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
External decorations	Sections of the woodwork have been painted.
	Visually inspected.
Conservatories / porches	None.
	•

Communal areas	None.
Garages and permanent outbuildings	There is a detached quadruple detached car garage which is of timber framed construction with a pitched tile clad roof. Access is via an up-and-over door to the front or a pedestrian door to the side. There are stairs providing access to a storage mezzanine area although access was not possible at the time of inspection due to stored items. Inspection within the garage was restricted due to stored items.
	Within the rear garden grounds, there is a PVC shed along with a uPVC framed double glazed summer room with wood burning stove installed.
	Visually inspected.
Outside areas and boundaries	There are garden grounds surrounding the house which are landscaped and enclosed with walls or fences. There is a water feature in the rear garden grounds along with a composite deck area.
	Accessed off the main bedroom, there is a balcony which is overlaid in composite decking with a PVC finish to the underside. This is enclosed with glass balustrades and a metal handrail.
	There is a large driveway providing off-street parking.
	Visually inspected.
Ceilings	Ceilings are plasterboard.
	Visually inspected from floor level.
Internal walls	Internal walls are plasterboard.
	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
Floors including sub floors	Flooring at ground floor level is partly of solid and partly of suspended timber construction overlaid with chipboard sheeting. Flooring at the upper levels is of suspended timber construction overlaid with chipboard sheeting.
	There is an access hatch in the utility room leading to a partial plant room for the swimming pool. This area is sealed by concrete.
	No access hatch was found to the sub-floor space of the main house.
	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.

	Y
Internal joinery and kitchen	Internal joinery is typical for a property of this age and is of timber.
fittings	In the kitchen there are storage units and a work surface which incorporates a sink unit.
	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
Chimney breasts and	There are gas fires in the living room, sitting room and main bedroom.
fireplaces	Visually inspected. No testing of the flues or fittings was carried out.
Internal decorations	Walls and ceilings are predominantly painted. Some internal walls are part tiled and the ceiling in the swimming pool area clad in panelling.
	Visually inspected.
Cellars	None.
Electricity	Mains supply. The main consumer unit is wall mounted in a w.c. apartment at ground floor level.
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Gas	Mains supply.
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.

	I and the second se
Water, plumbing and bathroom fittings	Public supply. Plumbing, where visible, is copper or plastic.
	In the main w.c. apartment at ground floor level, there is a two-piece suite. There is a w.c. apartment (no wash-hand basin) accessed from the utility room. Adjacent to this, there is a shower for the pool along with a steam room.
	In the ensuite accessed from bedroom one and bedroom two, there are five-piece suites and there is a five-piece suite in the family bathroom. In the shower room at top floor level, there is a three-piece suite.
	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric.
Heating and hot water	Heating for the main house is via a gas fired boiler which is wall mounted in the plant room. There are radiators throughout the house. There is a second boiler located within the plant room which is understood to supply the main heating unit for the pool area. Hot water to the house is via a large insulated hot water tank which is located in a cupboard at the first-floor landing.
	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
Drainage	Assumed to be connected to a mains sewer.
	Drainage covers etc were not lifted.
	Neither drains nor drainage systems were tested.

## Fire, smoke and burglar alarms

There are smoke alarms and a burglar alarm system installed.

Visually inspected.

No test whatsoever were carried out to any systems or appliances.

There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.

The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.

We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will require to be installed prior to sale. This of course should be confirmed by your legal advisor.

## Any additional limits to inspection

On the day of inspection, the property was occupied, fully furnished and floors fully covered.

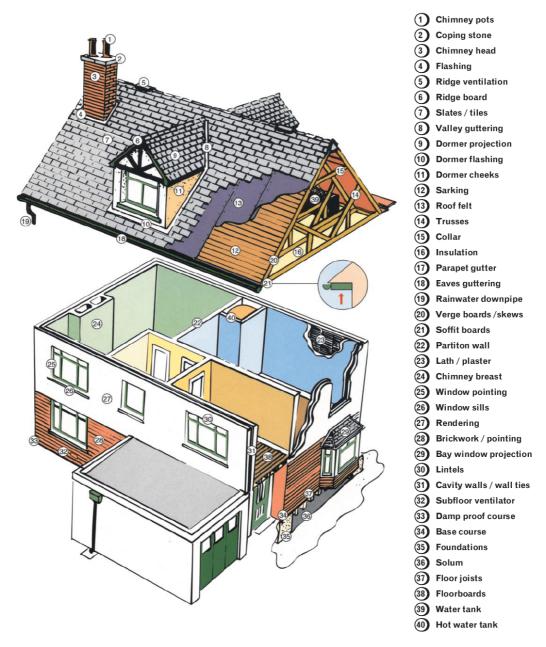

External inspection of the building fabric was restricted to ground level. Due to the height of the building and site constraints, some sections of the roof covering remain unseen.

Internal inspection was restricted due to personal belongings, furniture and fixed floor coverings. These items, particularly within cupboards, have not been moved.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

## 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movemen	t
Repair category:	
Notes:	No significant structural movement noted.

Dampness, rot and i	nfestation
Repair category:	
Notes:	No significant dampness, rot or infestation noted.

Chimney stacks	
Repair category:	2
Notes:	Spalled sections of brickwork were noted to the chimney. Vigilant maintenance can be anticipated in order to maintain a wind and watertight condition.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Roofing including roof space	
Repair category:	1
Notes:	The roof covering is affected by typical weathering and due to its size, will require regular inspection/maintenance.
	Flat roof coverings remain unseen and are assumed to be free from defect. Flat roof coverings can fail without warning.
	Concrete tiles are typically guaranteed for 30 years but have a reasonable life expectation around 50/60 years according to the BRE. Life expectancy will often depend on weathering and damage from the prevailing weather. A reputable roofing contractor will be able to advise on life expectancy and repair/replacement costs.

Rainwater fittings	
Repair category:	
Notes:	No significant defects noted. Rainwater goods should be tested during wet weather conditions for adequacy.

Main walls	
Repair category:	2
Notes:	There are a number of spalled sections of brickwork with some sections delaminating. Repairs can be anticipated.
	Staining was noted to sections of the main walls, especially adjacent to the main balcony at the rear elevation.

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Windows, external doors and joinery	
Repair category:	2
Notes:	Window units are of varying age and type. There are some failed double-glazed units where there is condensation between the panes of glass. Recent repair works have been carried out by the vendor to replace a number of failed units however some repairs are still required.  External timbers are weathered in part and will require routine maintenance/repair.
	Double glazing can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance repairs will be required as part of an ongoing maintenance programme. Our valuation does assume that the installation of the windows does comply with the necessary regulations at the time of installation.

External decorations	
Repair category:	
Notes:	Painted surfaces will require routine redecoration.

Conservatories / porches	
Repair category:	
Notes:	None.

Communal areas	
Repair category:	
Notes:	None.

Garages and permanent outbuildings		
Repair category:	Repair category:	
Notes:	No significant defects noted for the purpose to which they are put.	

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Outside areas and boundaries	
Repair category:	2
Notes:	A deflection was noted to the balcony at the rear. The condition of the structure beneath the composite decking and above the PVC panels is not known although repairs can be anticipated. This is likely to be caused by the lack of a drain/downpipe from the balcony surface.
	Some sections of the visible brick walling are affected by spalled brickwork.

Ceilings	
Repair category:	
Notes:	Affected by typical blemishes.

Internal walls	
Repair category:	
Notes:	Affected by typical blemishes.

Floors including sub-floors	
Repair category:	
Notes:	Some sections of flooring typically creak underfoot when weight tested. The condition of any underlying timbers is not known.

Internal joinery and kitchen fittings	
Repair category:	
Notes:	Affected by typical wear and tear.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Chimney breasts and fireplaces	
Repair category:	1
Notes:	It is good practice to have a maintenance contract in place in respect of the gas fires and solid fuel stove which are assumed to be in full working order and comply with all necessary regulations including manufactures specification. A Gas Safe registered contractor will be able to advise further.

Internal decorations	
Repair category:	
Notes:	Any blemishes or plaster cracking should be adequately dealt with during routine redecoration.

Cellars	
Repair category:	
Notes:	None.

Electricity	
Repair category:	
Notes:	No significant defects noted.
	It is advised that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC / SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IEE regulations.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Gas	
Repair category:	1
Notes:	No significant defects noted.
	Trade bodies governing gas installations currently advise that gas appliances should be tested prior to change in occupancy and thereafter at least once a year by a Gas Safe registered contractor. It is assumed that gas appliances comply with relevant regulations.
	The vendor states there is a gas service contract in place.

Water, plumbing and bathroom fittings	
Repair category:	
Notes:	No significant defects were noted to the sanitary fittings or any visible plumbing.
	No tests have been carried out whatsoever to the pool area and all the associated plant. A specialist contractor will be able to advise further and the purchaser should satisfy themselves in this regard.

Heating and hot water	
Repair category:	2
Notes:	Aspects of the heating and hot water systems are of varying age. Any documentation relating to the most recent installations of any boilers and pipework/radiators should be exhibited prior to purchase.
	It is good practice to have a maintenance contract in place in respect of the system which is assumed to be in full working order. The vendor states that the heating system including both boilers is serviced annually and the most recent documentation should be retained for future reference. It is assumed to comply with all necessary regulations and manufactures specifications.
	The vendor states that the Worcester boiler was installed last year and has 6 years remaining of a guarantee. This should be made available for transfer to the incoming purchaser.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Drainage	
Repair category:	
Notes:	No significant defects noted.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	2
Roofing including roof space	1
Rainwater fittings	1
Main walls	2
Windows, external doors and joinery	2
External decorations	1
Conservatories / porches	
Communal areas	
Garages and permanent outbuildings	1
Outside areas and boundaries	2
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	1
Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	
Electricity	1
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	2
Drainage	1

## Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

## Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

## 3. ACCESSIBILITY INFORMATION

**Guidance Notes on Accessibility Information** 

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES [ ]NO
3. Is there a lift to the main entrance door of the property?	[ ]YES [x]NO
4. Are all door openings greater than 750mm?	[ ]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES [ ]NO
6. Is there a toilet on the same level as a bedroom?	[x]YES [ ]NO
7. Are all rooms on the same level with no internal steps or stairs?	[ ]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES [ ]NO

## 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

## Matters for a solicitor or licensed conveyancer

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Multiple alteration works have been carried out over the years since the property was built in 1998 to form its current layout.

It is assumed that all necessary Local Authority and other consents have been obtained and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent, then it has been assumed that they meet the standards required by the Building Regulations or are exempt.

The property contains a swimming pool, steam room and plunge pool. The purchaser should satisfy themselves how to operate these features as they will require specialist advice.

This is a replacement report. The original inspection was carried out on 17 March 2025.

## Estimated re-instatement cost (£) for insurance purposes

£1,400,000 (One Million Four Hundred Thousand Pounds)

Building costs are currently increasing significantly above inflation due to material and labour shortages as well as Brexit and the pandemic. It is recommended that you update this figure regularly to ensure that you have adequate cover or alternatively seek specialist advice from your insurer.

## Valuation (£) and market comments

The market value of the property, in its present condition and with vacant possession, is £925,000 (Nine Hundred and Twenty Five Thousand Pounds).

Report author:	Gavin J Smith, Bsc Hons MRICS

# MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Mortgage Valuation Report					
Property:	72 Douglas Muir Drive Milngavie, Glasgow G62 7RJ	Client: Mr & I	Mrs. C Lewis		
Date of Inspection:	28/08/2025	Reference:	ND/6176/GS/AMCG		

This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

## 1.0 LOCATION

The property is located within the Mains Estate in Milngavie where immediate surrounding properties are of similar age, style and character. All usual residential amenities and transport links can be found within reasonable distance. Douglas Academy lies a short distance to the rear.

2.0	DESCRIPTION	2.1 Age:	The original house was	
			built in 1998 with multiple	
			extensions carried out	
			since.	

Detached three storey house with integral swimming pool and detached quadruple car garage.

## 3.0 CONSTRUCTION

The roof is pitched, timber framed and overlaid in concrete tiles. The flat roof is overlaid in Zinc (unseen).

The main walls are of cavity brick and block or modern timber framed construction, finished externally in pointed facing brick or PVC panels.

#### 4.0 ACCOMMODATION

GROUND FLOOR: Entrance hall with w.c. apartment off, open plan living room and dining room, kitchen, home office, integral swimming pool with sun lounging area and plunge pool, steam room, shower room, utility room, w.c. apartment, pump room.

FIRST FLOOR: Landing, bedroom one with walk-in wardrobe and en-suite bathroom off, bedroom two with ensuite bathroom off, bedroom three, bedroom four, bedroom five, family bathroom including w.c.

SECOND FLOOR: Gallery landing, bedroom six, sitting room, shower room including w.c.

Prepared by	Gavin J Smith, Bsc Hons MRICS
	Bearsden - Allied Surveyors Scotland Ltd

## **Energy Performance Certificate (EPC)**

**Dwellings** 

## **Scotland**

## 72 DOUGLAS MUIR DRIVE, MILNGAVIE, GLASGOW, G62 7RJ

Dwelling type:Detached houseDate of assessment:17 March 2025Date of certificate:17 March 2025

Total floor area: 422 m<sup>2</sup>

Primary Energy Indicator: 189 kWh/m²/year

**Reference number:** 9315-2727-9100-0773-5292 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

**Main heating and fuel:** Boiler and radiators, mains

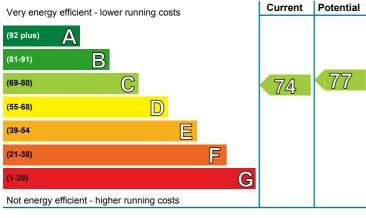

gas

#### You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£11,910	See your recommendations
Over 3 years you could save*	£	report for more information

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

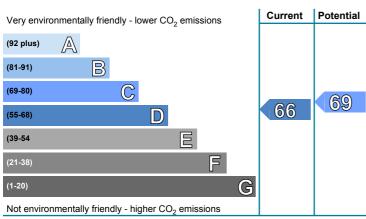

## **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band C (74)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide  $(CO_2)$  emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (66)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Solar photovoltaic (PV) panels	£3,500 - £5,500	£1170.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction. See the addendum section on the last page of this report for further information relating to items in the table.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, filled cavity Timber frame, as built, insulated (assumed)	**** ****	**** ****
Roof	Pitched, insulated (assumed) Roof room(s), insulated (assumed)	**** ****	**** ****
Floor	Suspended, limited insulation (assumed) Suspended, insulated (assumed)	_ _	_ _
Windows	Fully double glazed	<b>★★★☆☆</b>	<b>★★★☆☆</b>
Main heating	Boiler and radiators, mains gas Boiler and radiators, mains gas	**** ****	**** ****
Main heating controls	Programmer, room thermostat and TRVs	****	<b>★★★★</b> ☆
Secondary heating	Room heaters, mains gas	_	_
Hot water	From main system	****	<b>★★★★</b> ☆
Lighting	Low energy lighting in all fixed outlets	****	****

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 33 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 14 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£10,659 over 3 years	£10,659 over 3 years	
Hot water	£621 over 3 years	£621 over 3 years	You could
Lighting	£630 over 3 years	£630 over 3 years	save £
Totals	£11,910	£11,910	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		lu disetiva eset	Typical saving	Rating after improvement	
		Indicative cost	per year	Energy	Environment
1	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£390	C 77	C 69

### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

#### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	49,001	N/A	N/A	N/A
Water heating (kWh per year)	3,117			

#### **Addendum**

The energy assessment for the dwelling does not include energy used to heat the swimming pool.

### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Gavin Smith Assessor membership number: EES/018096

Company name/trading name: Allied Surveyors Scotland Ltd

Address: 132 Drymen Road

Bearsden G61 3RB

Phone number: 0141 942 9666

Email address: bearsden@alliedsurveyorsscotland.com

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

# PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

Property Address	72 Douglas Muir Drive
	Milngavie, Glasgow
	G62 7RJ
Seller(s)	C Lewis
Completion date of property questionnaire	

Note for sellers

1.	Length of ownership	
	How long have you owned the property?	
	27 years	
2.	Council tax	
	Which Council Tax band is your property	in? (Please circle)
	[ ]A [ ]B [ ]C [ ]D [ ]E [ ]F [ ]G [x]H	
3.	Parking	
	What are the arrangements for parking at your property?	
	(Please tick all that apply)	
	Garage	[x]
	Allocated parking space	[]
	Driveway	[x]
	Shared parking	[]
	On street	[]
	Resident permit	[]
	Metered parking	[]
	Other (please specify):	

4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance	[ ]YES [x]NO
	of which it is desirable to preserve or enhance)?	[]Don't know
5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	[ ]YES [x]NO
6.	Alterations/additions/extensions	
а	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	[x]YES [ ]NO
	If you have answered yes, please describe below the changes which you have made:	
	Grond floor indoor swimming pool, steam room, indoor jacuzzi, sating areas, utilty room, and toilet, bi fold sliding doors First floor master bedroom with large balcony, changing/ dressing room and ensuite Upper floor large hallway, shower room, bedroom, storage/ cupboards and large lounge with electric velux windows, dormer area with bi fold sliding doors Previous outside garage for two demolished and new 4 car garage built landscaping level lawn with artifical grass large decking area wth glass balastrade and water feature Also have planning permission and building warrent for new orangery and open plan kitchen area but no works have commenced	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	[x]YES [ ]NO
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
	We have documents	
b	Have you had replacement windows, doors, patio doors or double glazing installed in your property	[x]YES [ ]NO
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	[ ]YES [x]NO
	(ii) Did this work involve any changes to the window or door openings?	[ ]YES [x]NO

		u.
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):	
	Same size of windows but with a intricate diamond lead special design	
	Please give any guarantees which you received for this work to your	
	solicitor or estate agent.	
7.	Central heating	
а	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	[x]YES [ ]NO
	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).	
	Gas	
	If you have answered yes, please answer the three questions below:	
	(i) When was your central heating system or partial central heating system installed?	
	1998	
	(ii) Do you have a maintenance contract for the central heating system?	[x]YES [ ]NO
	If you have answered yes, please give details of the company with which you have a maintenance contract	
	British Gas	
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).	
	This Year	
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	[x]YES [ ]NO
9.	Issues that may have affected your property	
а	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	[ ]YES [x]NO
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	[]YES[]NO
h		[ ]YES [x]NO
b	Are you aware of the existence of asbestos in your property?
